

HORSESHOE POND
Chesterville, Franklin Co.
U.S.G.S. Farmington, Me.

Fishes

Smallmouth bass	Minnows
Yellow perch	Hornpout (bullhead)
Chain pickerel	Pumpkinseed sunfish

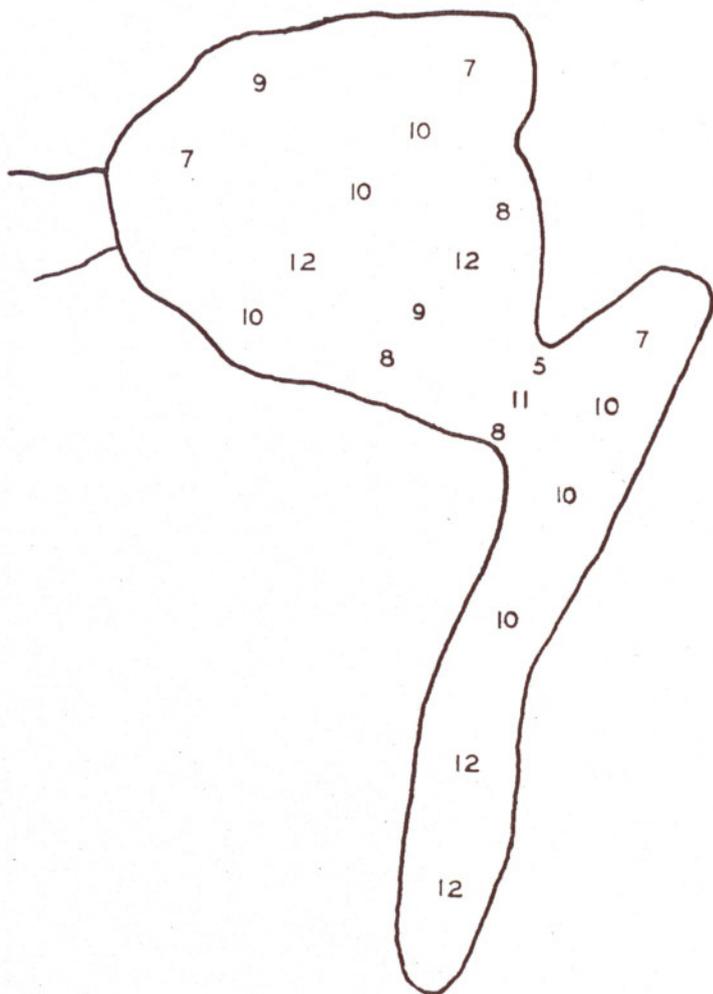

Physical Characteristics

Area - 58 acres	Temperatures
	Surface - 75°F.
Maximum depth - 12 feet	10 feet - 75°F.

Principal fisheries: Smallmouth bass, chain pickerel

Horseshoe Pond is a warm, shallow pond ideally suited to management for its warmwater fishery. Bass and pickerel exhibit good growth rates and spawning areas for these species are adequate. The lack of tributaries and the absence of cold water during the warm summer months preclude the possibility of establishing coldwater fisheries.

Surveyed - August, 1951
